C

## PERSONAL PROJECTS

### Online Shopping Portal

- An Online Shopping Portal built on PHP, Javascript and CSS which consists of two parts, Admin Panel and User Panel. Admin can add, delete or modify products and their description. User can search different products from different categories to add them into cart.

### Portfolio website

- A personal portfolio website built using HTML, CSS, JavaScript and JQuery which is hosted on Github pages.

### Calculator App

- My first android app built using Flutter. Supports basic calculations and has support for dark mode with a toggle for the same.
